

A recent incidence of vandalism at Eureka High School has caused a yet undetermined amount of damage to the main building; preliminary estimates exceed \$10,000. Unnamed EHS Seniors plugged sinks on the second floor and left the water running to flood the building in addition to pouring gallons of maple syrup over desks, lockers, etc. The attempt at a “Senior prank” was in fact vandalism that hurts the community as well as the students themselves who are now facing the repercussions. Eureka City Schools Superintendent Fred Van Vleck, Ed.D. reported that the families of the offending students have been supportive of the school and the disciplinary actions that come as a natural consequence to these activities. Due to the age of the perpetrators, very few details can be disclosed however students at the EHS graduation ceremony reported that the vandals were not allowed to participate in the graduation. Restitution and additional repercussions are expected. Eureka City Schools Administration can be reached at 441-2414 for additional details.
